Laminate Flooring

High-pressure Laminate

The high pressure Laminate surface is extremely durable , with a wear resistance and impact resistance many times stronger than other Laminate floors.

The ZENITH HPL withstands moisture most acid and alkalis , lighted sigarets and high impact blows.

it is also high scratch resistant.

AqueResist

The core material of ZENITH is our unique aqueresist HDF board which reduces the absorption of moisture to an absolute minimum.

in addition the edges are specially sealed against moisture penetration

Minimal maintenance

The floors are cleaned with a vacuume cleaner , a dry mop or a damp cloth with a synthetic cleaning agent if needed.

ZENITH floors must not be sanded or varinshed and require minimal maintenance.

Easy installation

ZENITH high pressure laminated flooring is anti-static. under normal conditions any static electricity will be directed through the floor without creating static discharges.

This is vital for areas with high traffic and a lot of sensitive electronic equipment.

Warranty

ZENITH provides the marked best product guarantee , from 6 years to lifetime depending on product chosen and area of use.

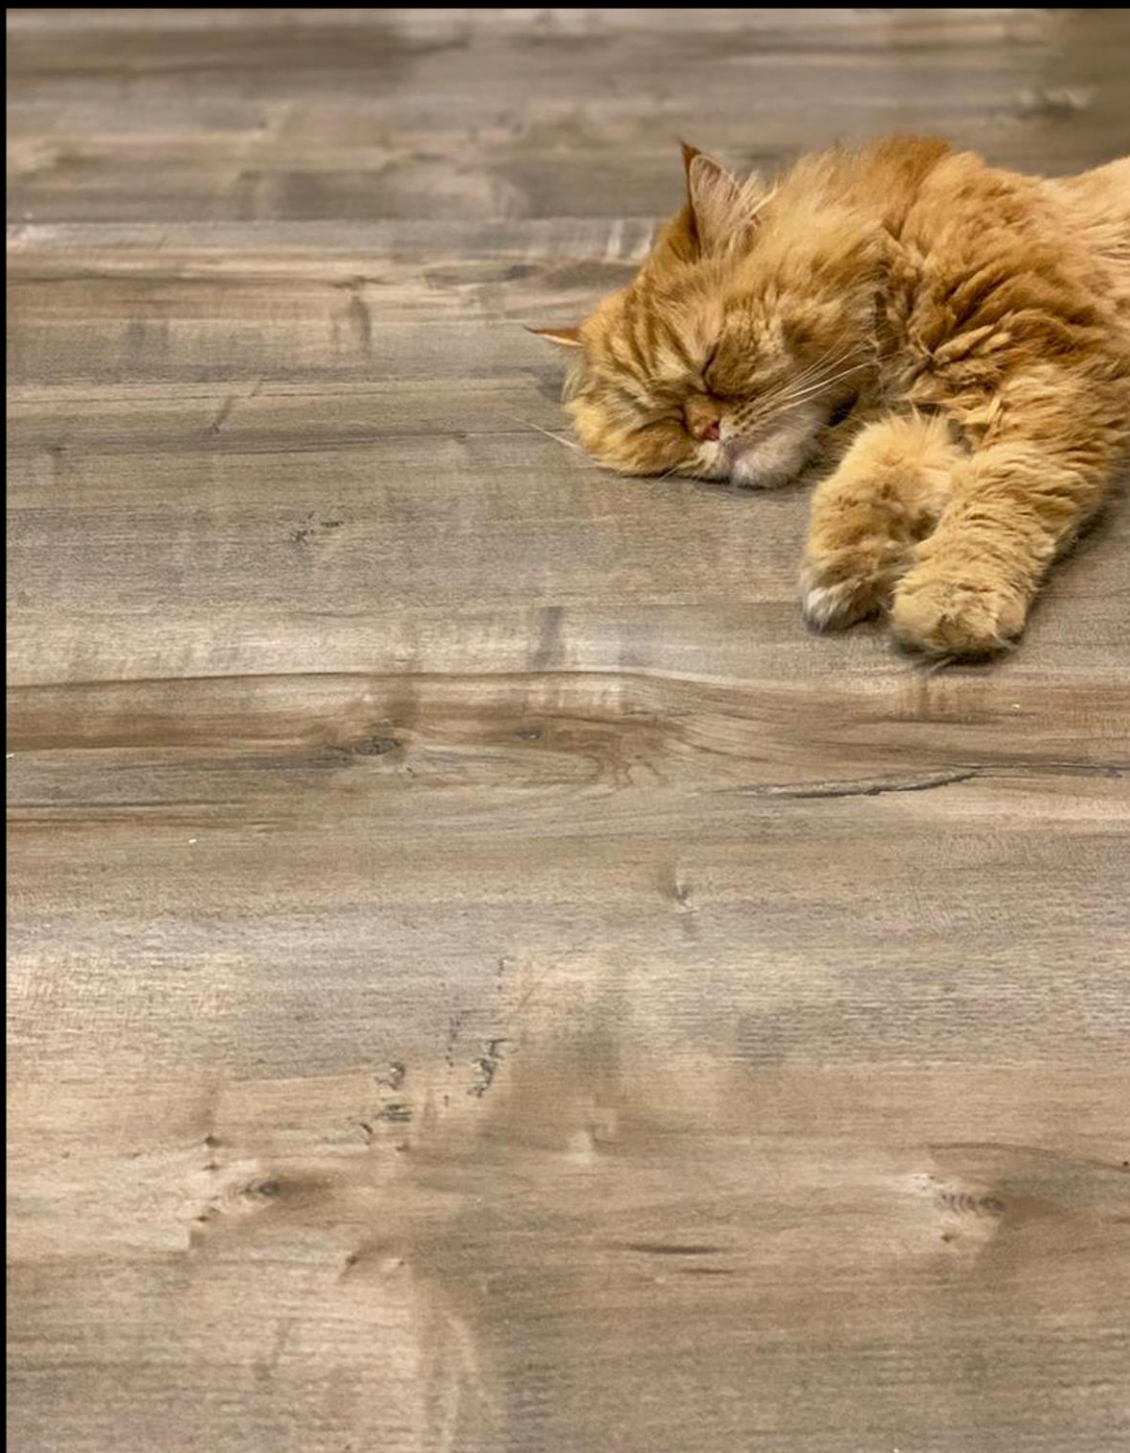

joint integrity / perfect installation

Allergy friendly

**HPL floors are antistatic and do not
dirt-an advantage in offices with Psc.**

**No glue and no chemical odour is
beneficial for asthma and allergy
sufferers.**

ZENITH
Laminate Flooring

Direct Laminate

Direct pressure laminate is a thinner laminate than HPL.

ZENITH DPL floors are in class 32 and are suited for rooms with lighter traffic like bedrooms etc.

Silent system

ZENITH is great to use in large expressive floorings, like large rooms, or a hotel lobby

wherever the architect wants a pattern with a strong personality.
